Art Unit: 2877

1. The following is an examiner's statement of reasons for allowance. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Englebart et al (US 7,039,485) is the patent which issued from application 10/799,306, incorporated into the instant specification on page 3, lines 14-18 thereof. It teaches determining whether defects are acceptable or unacceptable (column 5, lines 61-63), and whether an unacceptable defect can be repaired automatically or requires manual repair (column 6, lines 4-8). It also teaches marking defects "which are determined to not be repairable by automation" (column 6, lines 18-20).

The instant claims set forth a three-way indication, with the marking system indicating not only the position of the defects, including both acceptable and unacceptable defects, with the mark including some kind of indication as to (1) "whether the defect is acceptable" and whether (2) it can be automatically repaired or (3) requires manual repair. The Englebart et al reference does not teach marking defects with this three-way marking of the claims as amended, but only marking those that are unacceptable and require manual repair.

None of the other art of record appears to teach this three-way indication of the instant claims. This three-way indication has been argued in the remarks filed 3 August 2006; see the remarks, page 10, lines 9-11. Thus the claims as amended are allowable.
